Kick-Off Workshop ORD Xplore
Monday, April 3, 2023 – DSI Event Room, SOC-E-010

Digital editions open up new possibilities for connecting knowledge and therefore represent a central basis for future research. The ORD Xplore project uses metadata analysis to investigate possible new connections between documents made accessible by digital editions. At the kick-off workshop, the project will present initial results using the example of five edition projects at UZH and open them up for discussion. The workshop is aimed at anyone with an interest in digital edition interoperability issues. Overall goal of the workshop is to form a strong community.
